Subject: Fwd: Fence Line Air Monitoring

Good Morning Adam and Anthony.

I wanted to notify you about this new development. Are you aware that ITC is removing the real time air quality fence monitors surrounding our plant?

We are attempting to reopen our plant and told our employees that real time air monitoring for VOC's would help determine if we needed to shelter in place or evacuate our plant if there was another crisis at ITC or during Tucker Bayou Operations.

Could you please assist us by investigating ITC's decision? We would appreciate it!

Thanks !

Phil

Subject: Fence Line Air Monitoring

Good morning Brent! You and I were introduced on the Harris County EOC call a couple of days ago. You provided an excellent briefing and we appreciated the information sharing.

On that call you told us to notify you if we had any questions or concerns about any aspect of ITC's response efforts. I wanted to share a concern with you.

Our Industrial Hygienist Team on site at our Deer Park Incineration Facility were told by CETH that we could not access the automated fence line or monitoring system data loggers any more and that the units were being dismantled.

We are attempted to start up operations at the Incineration Facility And rely on the real time monitoring these units provide to protect our employees while we attempt to operate. We need those monitors to remain in place and we need real-time access to the data they generate.

Could you please insure that the monitors remain in place and that we have access to the data?

I am happy to get on a call this morning to discuss.

Thanks!

Phil
